### ABSTRACT

The career exploration program for grades 9 through 10, as part of a comprehensive K through 10 career development program, attempts to develop an awareness of and appreciation for work, extend knowledge of the variety of career opportunities, and provide experiences in career areas of individual interest. The document, a collection of materials consisting of student learning experience packets, and a resource list, is designed to introduce the students to the public and civil service occupations. The introduction discusses the career area definition, course objectives, course strategy, evaluation, and suggested time table. The course is divided into areas of government services and functions within which the students will explore representative careers. The learning activities are organized into objectives, activities and resources and cover: introductory activities, civil service, community planning, elected politics, law enforcement, fire protection, social service, postal service, courts, related career exploration, and self-evaluation of career maturity. Teaching methods involve discussion, group work, individual lessons, field trips, interviews with resource persons, films, and simulation. The appendix contains suggestions and procedures for both field trips and exploration trips, forms for exploration trips, job titles, and a resource list. (JB)

### CAREER DEVELOPMENT

The Career Development Program responds to the needs of students, taxpayers, and employers for the public schools to provide personal, social,
and economic <u>relevance</u> in the educational process. It is an integral part
of the educational process essential to the development of <u>all</u> students.

The Career Development components, which are Career Motivation (K-6), Career Orientation (7-8) and Career Exploration (9-10), develop an awareness and appreciation for work, extend knowledge of the variety of career opportunities, and provide experiences in career areas of individual interest. These goals are accomplished through a curriculum based on pupil activities involving simulation, role playing, and individual investigation. These activities require that administrators and teachers develop a new level of working relationships with community resources such as public institutions, business, labor, and industry.

Every individual's right to learn what he or she needs in order to be a producing, participating member of society is a fundamental responsibility of education. Each individual also has a right to self-fulfillment. Career Development, presented as inseparable elements inherent within every level and subject area of the school curriculum, provides each student with the skills and insights to recognize and pursue goals of personal significance. As a result of this program students will increase their abilities to make well-informed and experience-based decisions related to their personal life, school program, and career selection.

Donald R. Waldrip, Superintendent Cincinnati Public Schools

### CAREER EXPLORATION

Career Exploration is the 9th and 10th grade component of the Career Development Program. Its primary goal is to provide experiences related to career areas chosen by the student. Focus is on the student's perception of himself or herself in relation to the real world of career opportunities. Emphasis is on individualized and personalized activities and experiences.

The student chooses and studies a specific career area using skills and insights gained in earlier parts of the Career Development Program. Students explore occupations within the chosen area with particular attention to those most closely related to their own needs, interests, and abilities. They will experience some of the satisfactions, opportunities, limitations and frustrations peculiar to the various occupations.

Career Exploration is planned as the culmination of the Career Development Program. Successful exploratory experiences will enable the student to formulate and refine realistic and personally meaningful career goals. These experiences will also provide a basis for planning a course of studies in the 11th and 12th grades (and beyond) pursuing career goals.

Stanley A. Marsh

Administrative Assistant to

the Superintendent

ii

### **FOREWORD**

This manual is one of a series produced by the Cincinnati Public Schools as a part of a project designed to provide Career Exploration for students in grades 9 and 10.

It is designed to provide activities and information about an occupational area that will provide a more in-depth study than presented in Career Orientation in grades 7 and  $\delta$ .

This is a tentative guide and has been developed for the purpose of field testing and revising based upon feedback from participating teachers.

This manual was developed by Mr. John A. Brunner, counselor at Campbell Junior High School. Jack Ford, an instructional consultant, conducted the curriculum development under the general supervision of Mr. Ralph E. Shauck, Coordinator of Instructional Services.

I. INTRODUCTION

### A. Definition of Career Area

Federal, state, and local governments employ more people than any private business or industry in the United States. In 1970, 12.6 million people were working for the government. The career opportunities found in public and civil service encompass almost every occupation found in the private sector, and some that are unique to the government. In this course, the students will have an opportunity to explore those public and civil service careers that are an integral part of government administration.

### B. Course Objectives

- 1. To help the student identity a limited number of careers within public and civil service.
- 2. To help the student explore the process of locating, applying for, and securing a career in public or civil service, whether it be on a federal, state, or local level.
- 3. To help the student identify the qualifications necessary for these occupations.
- 4. To help the student compare his interests and aptitudes with those necessary for specific careers in government service.
- 5. To help the student participate in activities that simulate those integral tasks found in the actual performance of the given career.
- 6. To help the student identify a limited number of government services and avenues that will be beneficial to him as a citizen.
- 7. To help the student develop acceptable standards of behavior such as desirable personality, emotional control, dependability, responsibility, and loyalty.

### C. Course Strategy

### 1. Introductory Activities

A special experience being planned our soudents in every career exploration course is a small-group exploration trip. Effort has been made to make this as simple as postable for the classroom teacher. As noted in Appendix B, these trips may take place before the first class meeting for those courses which are scheduled for the second, third, or fourth quarter.

### 2. Procedures

The student will proceed through the Student Activity Units beginning with Civil Service and Community Planning. These units form the foundation for the remaining activities and explorations. Some activities must be completed as a class unit, others in small groups or individually, at the discretion of the teacher.

`

This course is divided into areas of government services and functions. Within this framework, the student will explore representative careers. Those careers which are included as representative should not limit the students' exploration, but serve as a starting point. They should explore many other occupations in each area, especially those that are compatible with their own interests.

### 3. Evaluation

- a. A pre-test and post-test will be administered to the students to determine any change in their knowledge of and attitude toward public and civil careers.
- b. The students will, on completing the course, be able to identify five careers within government service, and describe the tasks involved, and the qualifications necessary.
- c. At the completion of the course, the students will evaluate and make suggestions for improvements.

### D. Suggested Time Table

### Exploration Activities

#	Title	Days	
1	Introduction	2	Class periods
2	Use of D.O.T.	1.	
3	Civil Service	7	
4	Community Planning	6	
5	Elected Politics	5	
6	Law Enforcement	4	
7	Fire Protection	4	
8	Social Service	4	
9	Postal Service	5	
10	Courts	5	
11	Related Career Exploration	(variabl	.e)
12	Self Evaluation of Career Matu	r <b>ity</b> 2	

This is only a suggested time table. It can be altered at the teacher's discretion.

### II. Career Exploration Activities

### A. Where to Begin --

1. Resources essential to pupil activities: Many resources listed on the following pupil activity sheets must be made available in the classroom before the students can begin the activities noted. These essential resources are specified IN WORDS on each exploration activity worksheet. THEY MUST BE OBTAINED BY THE TEACHER IN ADVANCE OF THE CLASS MEETING.

### Examples:

### a. Films

If . . . the worksheet reads:

RESOUR	CES			
Film:	Code	Blue	(c-7)	

Then . . . The teacher must look in Appendix C, Item 7 for catalog information so that this film can be ordered in time for this activity.

b. Material to be duplicated by the teacher for use in class.

If . . . the worksheet reads:

RESC	OURCES		
See	Analysis	Quiz	(B-4,5,6)

Then . . . The teacher must duplicate a class set of this item which is found in Appendix B as items 4, 5, and 6. Duplication can be achieved by Xeroxing, generating a ditto master via photocopying with IBM 107 and Thermofax or retyping onto a ditto master.

2. Optional resources to be used for enrichment, supplements and student or teacher reference are described only in the Appendix.

If . . . the worksheet reads:

RTSOURCES
<b>c-8</b>

Then . . . This indicates that for this activity there is a potentially useful reference described in Appendix C, Item 8. This reference item is not essential to the completion of the student activity.

RESOURCES

### INTRODUCTION TO COURSE

ACTIVITIES	
OBJECTIVES	

# Students will be able to:

- 1. Discuss critically the objectives of the course.
- Question people's attitude at work under various conditions
   as illustrated in a film.
- 3. Form a general understanding of the course outline and procedure.
- 4. Form some basic conclusions

  L through the "self-analysis

  Quiz."
- 5. List a.d discuss at least h important factors of good on-the-job performance.
- 6. Describe a wide variety of skills needed for specific jobs in this occupational area.

- 1. The student will be informed of the purpose of this course, what is hoped to be accomplished, and will be led into a discussion of activities involved in Career Exploration.
- 2. The student will defend or reject by role playing, the position of maintaining good personal appearance, attitude and conduct on the job.
- . Explain to students the relation of the course and the "Self-Analysis Quis" to their career selection. Students will participate in this self-analysis quiz.
- Hand cut and discuss a "Job-Performence Rating Sheet" which will be administered and discussed as part of the last exploration activity in this course.

Class set of "Self-Analysis Quis" (attached)

Class set of "Job Performence Rating Sheet" (attached) "What no We Look Like To Others" 16 mm film, 10 min., Sandler Instructional Films, Inc. Board of Education.

### SELF-ANALYSIS QUIZ

Directions: Check the line closest to the statement that identifies you. If you are uncertain, check the middle space.

Make at least average grades	 Make below average grades
Learn quickly	 Learn slowly
Enjoy reading books, magazines, etc.	 Enjoy reading comics
Like school and do extra work	Do only schoolwork that is necessary
Talk and write well	 Talk and write poorly
Good planner and organizer	 Poor planner and organizer
Like children	 Dislike children
Patient with children's questions	 Impatient with children's questions
Outgoing	 Withdrawn
Popular	 Not popular
Have large group of friends	A few close friends
Have confidence	 Unsure around others.
Give advice	 Not asked for advice
Outspoken	Quiet
Sensitive to others	Insensitive to others
Trust people	 Do not trust people
Volunteer	 Do not volunteer
Pleasant personality	 Do not have pleasant personality
Have a sense of humor	 "Touchy"
Not prejudiced	Prejudiced

relationship of that job to data, people and things. This exploration activity provides the students some experience in using this information to identify jobs which match their interests. The D.O.T. lists 35,550 jobs with a code number for each. The last three digits of this code refer to the

RESOURCES	b data, tional Titles, Volumes tional Titles, Volumes I and II  Make a class set of "Examples of D.O.T. Code Usage." things job Make a class set of the "D.O.T. Worksheet"	
ACTIVITIES	The teacher will conduct a classroom discussion on the D.O.T. code number in identifying the data, people, things orientation of jobs. (See the attached page for examples.) Following this discussion each student is to complete the "D.O.T. Worksheet" which compares the student's estimate of the data, people, things job content to that listed in the D.O.T.	
ONECTIVES	Compare their knowledge about the data, people, things content of jobs to factual information listed in the D.O.T. for five jobs of personal interest.	

The

### D.O.T. WORKSHEET

- STEP 1. In table I at the bottom of this page, write the names of five jobs which are interesting to you.
- STEP 2. Use the handout sheet titled "Examples of D.O.T. Code Usage" and make an estimate of the correct code to describe this job.

  Record this estimate in Table I.
- STEP 3. Use Volume I or II of the D.O.T. and look up the D.O.T. code designation for each job. Compare these designations to your estimate.

RESOURCES	
ACTIVITIES	
OBJECTIVES	

- Participate in a simulated interview.
- 7. Identify at least 5 local federal, state, and city government occupations.
- 8. Compare interests with available occupations in government service.

19

9. Identify careers in all areas of government service and compile a career file that would continue to grow throughout the course.

- 5. Divide students into groups of two's. Assign a particular position for which a person is interviewing and let students role-play, taking turns as interviewer and interviewee. Choose a couple groups to role-play before the group and allow the class to discuss the good and bad points.
- 6. Using the local newspapers, the students can cut out articles dealing with civil service occupations and post them on bulletin board in classroom.
- 7. All 9th grade students took the Chio Vocational Interest Survey in the 8th grade. All 10th graders will take it this school year. The students can compare their interests as expressed and indicated the CVIS with those career opportunities in public and civil service. A copy of the CVIS print out can be atored in each students' personal folder for future reference throughout the course.
- 8. Create a continuing career file composed of newspaper and magazine articles, or any other items such as pamphlets, booklets, etc. about government careers. The file could be divided along the same lines as this course: civil service, community planning, etc.

Cincinnati Post and Times Star and Cincinnati Enquirer. A copy of each students' print out of the OVIS can be found in the students' cumulative folder. See counselor for details.

Newspapers, magazines, and other printed material.

Representative occupations

City planners develop comprehensive plans and programs for the growth and overall revitalization of urban communities. City Planner: 199.168 Page 769.

City Planning Aid: 199.388 Fage 131. Compiles data for use of city planner in making planning studies

017.281 Page 218. Draws maps of cities, counties, states, and other areas showing identity of roads, communities, commercial or industrial structures, political boundaries, etc. Map Draftsman:

See Appendix for more job titles in Community Planning (Appendix F-1).

### THE USE OF THE "LAND USE MAP"

City planners are constantly utilizing the "Land Use Map." Through it they can identify what and where things are in the neighborhood. They can then ask the following questions: Is the land use good? Does it lead to a good life for the people who live there?

### Housing

Are there a number of different housing types that give the people a choice as to space, cost, and style? Are there any health problems because of the design of the housing? Is the housing located near parks, schools, stores, places of work, and transportation?

### Stores

Are the stores conveniently located within reach of the residential areas? Do they provide the residents with a good selection of those items that they need or are there some things a person has to go elsewhere to get? Are the quality and prices good at the local stores?

### Industry

Can a person find a job near his home? Do the factories create problems for the residents; such as, traffic, noise, air or water pollution?

### Services

Are such services as medical, fire, and police readily available to the people of the neighborhood?

### Open Spaces

Do the people have enough parks, playgrounds, and public squares within easy reach.

### Transportation

Is there quick and cheap transportation to other areas of the city? Do automobiles cause any problem in the neighborhood?

# EXPLORATION ACTIVITY #5

### Elected Politics

### EXPLORATION ACTIVITY #

Individual Student Exploration into Related Careers. Because of the smittplicity of careers in this occupational area, many have been left untouched in this curriculum guide. In this exploration activity, the students can explore a related career of their choice. There are a number of related careers which are the major subject of other curriculum guides.

BERUBCES	Dictionary of Occupa- tional Titles, Volumes I & II. Occupational Outlook Handbook 1972-73 Ed. Encyclopedia of Careers and Vocational Guidance Volumes I & II (Doubleday) Largo or SRA Career Kits Make a class set of the "Individual Career Exploration Worksheet"	
ACTIVITIES	Each student selects and explores a career or job which is related to both his individual interest and the occupational area described in this curriculum guide.  The students are to use career information reference located in the class room, school library, public library, their homes and community as resources to complete an "Individual Career Exploration Worksheet" which is attached.	32
OBJECTIVES	The student will be able to:  1. Identify and explore at least one additional career related to their individual interests and this occupational area.  2. Locate and record specific information related to a career of individual interest to him.	

### INDIVIDUAL CAREER EXPLORATION WORKSHEET

1.	Student's Name:
2.	Related careers being explored:

### ERIC"

# Student Self Evaluation of Career Maturity

This activity is planned to help the students analyze and learn to value their career-related experiences and the level of their career maturity.

Seven areas of growth and development which have been identified for this use are as follows:

- Individual and Environment (Social Awareness)
- Individual and Environment (Social Awi Economics
- 3. World of Work

areness) 4. Education and Training 5. Employability and Work Adjustment Skills 6. Vocational Decision Making

**LCTEVITIES** 

7. Self (Self-Avareness)

RESCUECES

# The student will be able to: - Respond, in a purposeful and business-like manner, to one or more intagestions which ask the student to analyze their experiences in the developmental areas.

Rach student is asked to seriously consider their career related experiences. A brief class discussion and/or small group discussions may be used to introduce this topic.

The students should view the films "What Do We Look Like to Others" and "I Want to Work For Your Company If these films have been viewed previously they should be reviewed and discussed.

Following a review of these films each student is asked to respond to a set of self-analysis questions prepared by the teacher. To help the teacher in preparing these questions a definition of each developmental area and sample questions for each area are attached to this sheet.

41

The teacher will need to generate class sets of questions.

These two films are available from Resource Services on Iowa Street.

### DEFINITIONS OF DEVELOPMENTAL AREAS

### Individual and Environment (Social Awareness)

In this area of the student's development, the student must determine who he is and how he relates to his environment. He must be involved in experiences which will help him to determine his relative abilities to work with people, to manipulate tools, to sense his presence in his environment, and to comprehend laws of nature and the processes for behavioral advancements within his community.

The student will be involved with understanding his interests, aptitudes, achievements, temperament, his family peers, his society, and etc.

### Economics

Students must learn to see themselves as a productive worker unit who supports his community through efficient positive efforts as a producer and consumer. He must learn that the money he receives for his work is an important factor in determining the behavior of his community through the way in which he spends his money; the way in which he is willing to work for his money; and how this spending gives direction to the use of raw materials for production and consumption of goods and services to be used in his community.

The student must learn what is meant by a fair day's pay for a fair day's work and the implied obligations between the consumers and producers.

### World of Work

This area is concerned with the student's development of a method for collecting information about jobs. It also is concerned with the student developing an understanding of what behavior is required to do certain jobs. Examples of job information include, in part, the following items:

Job entry levels Performance activities Working conditions

Education and training requirements.
Availability of jobs
Seasonality of jobs
Job status
Advancement possibilities

### Education and Training

The student must learn what behavior modifications (education and training) will be expected of him for certain jobs. In doing so he will learn the innate abilities he has and if these abilities can be developed to the level required to perform certain jobs he chooses for his vocation.

Students must learn which educational programs will help them to acquire the experience that will help them to develop the performance behavior required for certain jobs.

### Employability and Work Adjustment Skills

This section is concerned with attitude strategies and the importance of the development of successful attitude strategies which are necessary for continued economic gains.

Students must learn how good attitudes are a contribution to their own adjustment and success as well as the success of their community. People are dismissed from their jobs more often because they cannot get along with people than they are because they do not have the skills for their jobs.

### Vocational Decision Making

Students must learn a method for making decisions if they are to become employable and well adjusted citizens. They must learn to gather facts about themselves, jobs, and values and how to weigh this information to reach a conclusion as to what work they are able to do and what work they want to do. Self

In this area the Self as subject is the major focus. Self as subject requires that the person's own feelings, perceptions and beliefs are dealt

with. This requires an internal orientation to the activities as opposed to the external orientation of activities for the other areas.

Seven topics are developed in the broad area SELF. These trace self-awareness, self-acceptance and self-affirmation of the child through interests, aptitudes and abilities, achievement and values and attitudes.

### SAMPLE QUESTIONS FOR CAREER MATURITY

Listed on this page are sample questions related to areas of growth and development.

### 1. Self and Environment

- What things have I done with any degree of success?
- What things have I done that others have commended me for doing exceptionally well?

### 2. Economics

- How much money have I earned?

### 3. World of Work

- What jobs have I held? Describe them in detail.

### 4. Education and Training

- What courses have I taken that would prepare me for an entry job position?

### 5. Employability and Work Adjustment Skills

- What were the expectations of employers concerning the job I have held?

### 6. Vocational Decision Making

- Where could I get additional information about jobs and careers?

### 7. Self

- What are the things I really like to do?
- What are the things that I don't like to do?

### III. APPENDIX

- A. Field Trips in Career Development
- B. Procedures for Exploration Trips
- C. Exploration Trip Permission Form
- D. Exploration Trip Report
- E. Job Titles
- F. Resources

### FIELD TRIPS IN CAREER DEVELOPMENT

### General Student Needs

- 1. Field trips commonize the background of the students so that there is a basis from which to develop a strong well-rounded instructional program.
- 2. Because the student is so far removed from his potential career, he needs a broad understanding and exposure to work.
- 3. Broad off-school-site experiences build readiness for learning by demonstrating that basic skills are essential to a productive work-life.
- 4. To thoroughly understand a career, the student needs to see the job first hand.
- 5. Students may not realize all the implications/facets of an occupation in terms of personal interests until they have an exposure to the worker in action.
- 6. Omission of hands-on experiences may cause a lack of credibility in those courses taught, in the upper levels.
- 7. While field trips benefit the student, they also benefit the teacher, who, without their assistance, is required to serve as expert on the details of many careers which are not necessarily related to his own speciality.
- 8. Field trips, when used correctly, can be a source of creating better communication and understanding between business, labor and industry in the community and the school.

### Specific Student Needs

### Field Trips will do the following:

- Develop an appreciation/awareness that an individual's skills, talents and senses are used in a variety of ways.
- 2. Develop an awareness of the importance of responsibility and attitude for one's work.
  - 3. Encourage the development of communication skills. Broad off-schoolsites experiences demonstrate need and provide motivation for skill learnings.
  - 4. Develop an awareness of the interdependence of the student and all workers.
- 5. Develop an awareness that there are many people who have different responsibilities in business, labor and industry.

\_

6. Develop as awareness that workers are not necessarily associated with or limited to a specific location and an understanding that there are many kinds of work within specific sites/fields.

### GUIDELINES FOR IMPLEMENTATION OF FIELD TRIPS IN CAREER DEVELOPMENT

- 1. The local administrator is responsibile for observance of the guidelines by participating staff members.
- 2. The local administrator should take responsibility for appointing a person to finalize field trip arrangements.
- 3. There should be planning of each trip well in advance.
- 4. Teachers should make field trip plans in consideration of/consultation with other teachers who have a teaching responsibility for the pupils.
- 5. For the convenience of the faculty, field trip information should be given out several days in advance including destination, length of time out of school, and students participating.
- . 6. The teachers should be aware/appreciative of the expense of the trip to the business or industry in relation to the time spent hosting visitors.
  - 7. Teachers should justify the trip in relation to their instructional program.
  - 8. Teachers who desire to take a particular field trip should plan the trip together, although they may not go together.
  - 9. The faculty of each school may prepare a list of meaningful walking trips utilizing the resources of the local community.
- 10. After the arrangements have been made, and before the trip, there should be communication between the teacher and the contact person at the place where they are going to clarify teacher expectations.
- 11. Students should be adequately supervised not only for their safety, but to minimize the interruption to business or industry.
- 12. There should be well planned pre- and post-activities for each trip.
- 13. After each trip, there should be a note of appreciation to the business or industry. The teacher may communicate the extent to which expectations were met.
- 14. A follow-up report concerning the value of the trip and results relating to the specific reason for the trip should be submitted to the administrator/coordinator.
- 15. Identify the businesses and industries of the Cincinnati community that have only one representative (i.e. the phone company) and those businesses and industries that have multiple representatives in this community (i.e. bakeries, garages).

- 16. To avoid overloading of limited field trip sites, and to maintain privileges, it is necessary to clear requests for these trips through a central clearing office to be designated by Jack Ford.
- 17. Teachers may build a list of trips and experiences that parents could provide for their children outside of school hours.

### PROCEDURE FOR EXPLORATION TRIPS

### SCHEDULE CONSIDERATIONS:

An opportunity is to be provided for students to visit cooperating organisations in small groups for a highly personalized and individualized experience directly related to their career interests. It is essential to minimize the burden on cooperating organisations and to distribute this burden among all community resources and throughout the school year. To accomplish this, trips must be scheduled from the beginning of the school year, and be evenly spaced during the year until every student has been accomplated. The students in a quarter length exploration class may, therefore, participate in an exploration trip prior to, during, or following the time that the course is in progress.

### PROCEDURES:

Once each month, or even less frequently, the teacher will need to:

- 1. Place a single phone call to a cooperating organization to set the date and time for the trip.
- 2. Notify Mr. Jerome Coumins (Education Center, 230 East Ninth St.) of the date and time for the trip.
- 3. Select six students from the Career Exploration class list.
- 4. Send permission slips and trip report forms to the selected students via their homerooms.

Permission slips and report forms are illustrated on the following pages. These forms should be reproduced from this curriculum guide as required.

The career committee chairman or coordinator will provide you with a list of organizations which are known to be willing and able to accommodate your students. Addresses, phone numbers and names of persons to contact will be provided.
